

# GLISSADE™

INTERNAL VERTICAL  
BLINDS

## GLISSADE™ PANEL BLINDS BEAUTIFUL VERSATILITY.

More and more, the modern house design is opening itself up to the great outdoors.

Sliding doors and bi-folds are blurring the line between inside and out, effectively making them one entity. So it makes sense that window fashions should follow suit, with cutting-edge style and effective ways to dress these larger expanses of glass.

Ultra modern and aesthetically stunning, the award nominated Glissade™ Panel Glide System by Uniline is a patented system of sliding fabric panels that can be fitted to any size sliding door.

Panels can be either face fit or taken right up to ceiling height, well above the sliding door, for a fabulous ceiling-to-floor fabric drop that creates the illusion of much higher ceilings. Glissade™ also looks beautiful as a chic room divider. In a matter of moments, an open-plan room can be divided for any purpose – privacy for staying guests, a quiet reading nook or perhaps a home office alcove.

Lightweight and easy to operate, the Glissade™ panels open and close with a metal wand, so can be quickly moved out of the way if you need to access a door or section of a room.

Whichever panel or stacking option you choose, rest assured your Glissade™ panels will look stunning, slide noiselessly and let in as much, or as little, of the outside world (or next room) as you like.

## THE CHOICE IS YOURS

- Australian Design Award Finalist.
- Engineered for smooth and noiseless operation.
- Minimal track spacing means reduced light penetration.
- Various choices of panel width.
- Can be fitted as a window furnishing or room divider.
- 3-6 track options with optional pelmet.
- Glissade™ rails come in five different colours.
- Sturdy, rust-resistant aluminium tracking and sliding rails.
- Universal pelmet gives a consistent look with other Uniline products.
- Exclusively Australian designed.

As an Australian Design Awards finalist, the innovative Glissade™ has a single track profile, regardless of how many panels are needed to cover an expanse – three, four, or more panels. Glissade™ offers minimal light penetration via panel overlap and minimal track spacing, whilst the robust tracking and sliding rails ensure a long life of quiet, fuss-free operation.

The oversized fabric panels reflect the current trend for minimal window treatments, while the Uniline range of fabrics offer endless options to reflect your individual taste and style. Depending on your privacy and sun protection needs, there is a translucent or blockout weave to suit you.

### GLISSADE™ BLINDS ARE COMPATIBLE WITH THE FOLLOWING FABRIC RANGE:

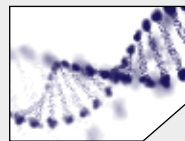

DAWN

DAWN PEARLISED
