

TRU-STEEL

LOUVRE AND CANOPY
EXTERNAL AWNINGS

TRU-STEEL LOUVRE AND CANOPY AWNINGS.

Australian made Uniline Tru-Steel Louvre and Canopy Awnings are an economical, attractive and practical choice to minimise the effects caused by Australia's harsh climate.

Tru-Steel Louvre Awnings are constructed with curved panels which are rigid and corrosion resistant to endure Australia's harsh climatic conditions. Available in three variations: standard pitch, closed pitch and adjustable louvres with internal controls.

Tru-Steel Canopy Awnings are produced with steel, multi-rib cross section skin panels to provide greater strength, wind resistance, and better protection against hail and storm damage. Powder coated components contribute to the long life of Uniline Tru-Steel Canopy Awnings.

Suitable for both domestic and commercial applications, Tru-Steel Canopy Awnings are available in either self supporting or post support types.

THE CHOICE IS YOURS

- Tru-Steel's superior oven-baked finish resists chipping, peeling or cracking.
- Tru-Steel is made with a zincalume steel base for anticorrosion, a conversion layer and epoxy primer to enhance coating adhesion.

TRU-STEEL AWNINGS ARE COMPATIBLE WITH THE FOLLOWING COLOUR RANGE:

IT'S YOUR CHOICE.

The preferred window covering system supplier to the industry.
